## Carmangay Exhibition Thurs.-Fri., August 6-7

The Carmangay fair, to be held on Thursday and Friday, August 6th and 7th, is the outstanding event of the coming week. Interest in this fair has increased in this part of the fair district of late years and exhibits and attendance have been noticeably larger. This year the fair comes at an opportune time, before the beginning of wheat harvest, and even greater support should develop than usual from Champion and vicinity.

The directors of the fair have made every effort to rouse interest in their fair, and the prize list is remarkably generous for a fair of this class. The community exhibits, in which Champion, Carmangay and Barons are the competitors has resulted in some beautiful displays of garden and farm produce, admittedly bringing out highly creditable displays, hard to beat anywhere.

The attractions include horse races and stampee events, baseball, softball and a complete program of athletic events while a merry-go-round and midway are also included.

The following special prizes have also been donated for this year's fair:

Lamb trimming competition, girls, \$5.00, divided into two prizes, \$3.00 and \$2.00—donated by Brown McDonald.

Lamb trimming competition, boys, under 10, \$5.00, divided into two prizes, \$3.00 and \$2.00—donated by J. Atkins.

Best heavy draft horse, 4 years or over, \$5.00—donated by D. H. Bennett.

Best saddle horse, \$5.00—donated by W. McLeod.

Best Shorthorn cow, best class, \$5.00—donated by M. McLaren.

Best pen grade sheep, three females and purebred ram, silver cup, donated by Alex. McDougall.

Best draft team, silver cup—donated by Chas. McDougall.

Best bacon type boar, \$5.00—donated by E. Nowlin.

100 lbs. Purify Flour for best loaf of bread made from Purify Flour, empty sack to be with exhibit—donated by Wilson McLean.

Four prizes (\$3.00, \$2.00, \$1.50, \$1.00) for best half dozen biscuits baked with Blue Ribbon Baking Powder—donated by Blue Ribbon Limited.

100-lb. sack Royal Standard Calf Meal for best dairy calf raised on Royal Standard Calf Meal (entrant must show receipt for purchase of meal from O. L. Taylor)—donated by Spillers.

Clydesdale Horse Breeders' Ass'n Gold Medal for best female Clyde, must be registered in owner's name.

This local fair deserves more than the ordinary consideration on the part of residents in the district. The competition in various products could not fail to be an incentive towards promoting more general efforts to bring individual production up to higher standards than would otherwise prevail, but the fair is a meeting place where you may widen your acquaintance with the people surrounding you and also with the capacity of the district as a producer in the various lines exhibited. By all means make a special effort to attend your local fair.

Miss Mary Bowman accompanied her friends Mr. and Mrs. Melton on their return to Indiana, from word received from her, she says the heat is extreme there—Carmangay Sun.

Mrs. E. Latiff and children are on a visit to her parents at St. Mary.

Misses Audrey and Doris Leach are visiting friends at Nobleford.

M. G. Clever celebrated his 61st birthday on Monday, a number of friends assisting.

### Musiel-Peters

A quiet wedding was recently solemnized at St. Paul's church, Nelson, B.C., when Rev. T. J. S. Ferguson united in marriage Mabel Edith Peters of Vancouver, a daughter of Mr. and Mrs. George Peters of Champion, Alta., and Gerald Sylvester Musiel, son of Mr. and Mrs. J. Musiel of Vancouver. Mr. and Mrs. Musiel have taken up residence in the Petty apartments, Falls Street, Nelson.

### W.I. Members Entertained at Vulcan

Nineteen W.I. ladies were guests of Mrs. W. M. Martin at Vulcan on Tuesday when a particularly enjoyable afternoon was spent. Mrs. Martin has a splendid home, including a wonderful garden, and the relief from the sun blistered conditions prevailing was especially welcome. All present speak in the highest terms of their entertainment.

### J. S. Collins on Vacation G. M. Atkins Relieves

Mr. and Mrs. J. S. Collins and family left last week for States points, Kentucky, Mr. Collins native state, being one of the objectives. They will be away for two months. He is being relieved in the C.P.R. depot by G. M. Atkinson of Bethune, Sask., who with his family is located in rooms in the Savoy hotel.

### Moffatt Irrigation Scheme Makes Outsiders Envious

The use of water from the system installed by J. M. Moffatt has permitted the several citizens who are connected with it to protect their gardens and lawns through the big dry spell in a very satisfactory way, and the green oases thus created are very noticeable as compared with the burned up conditions surrounding. It is a matter of regret that a town water supply is so far away in the future as a possibility.

Lars Hjelle has a seven acre garden in the valley, near the headquarters of the irrigation company, and is offering a supply of fresh vegetables to the people of this vicinity. Considering the condition of average gardens his offerings should be very acceptable to residents within reach of his garden. Note advt. elsewhere in this issue.

In last week's issue it was stated that Mrs. C. Williamson was en route to Devils Lake, N.D., on receipt of the news of the death of Rev. W. C. Marsh. Owing to the fact that it was impossible for her to arrive in time for the funeral Mrs. Williamson postponed the trip to a later date.

Don Bond has secured a position in O. L. Taylor's store at Carmangay.

Information to hand would indicate that Helen Holm, Donald Bond were entirely successful in their Grade XII examinations, while Donald Stephenson achieved a pass with the exception of two marks in Latin. Edna Orr, Beulah Campbell and Betty Alder also passed. Marion Gardner and Helen Farmer, who attended school at Frank and Trochu, respectively, both passed. Ilean McCullough passed the Grade XI examination, and five subjects in Grade XII.

## NOTES AND COMMENT

While the fact that farmers or laborers have not conserved their resources does not relieve the rest of the people from coming to their assistance when low prices or unemployment leave them in distress, it is worthy of note that the elements advocating secession and communism in the majority of instances have themselves very largely to blame for the fact that the present depression found them unprepared for adverse circumstances. The fact cannot be ignored that we have been living too fast and too expensively, without thought of the future, except as a period of advancing prices and bumper crops. Optimism may keep the wheels turning rapidly for a long period after they should have slowed up but in the end the result is only aggravated by the further depletion of resources resulting from the insistence that good times are just around the corner.

Chicago wheat experts, studying the present price situation, arrive at the conclusion that all government and other interference has been costly in the fact that it induced the sowing of more wheat in the face of a huge surplus, which has been growing steadily for the past six years. Efforts by governments and other bodies to increase the price of grain or other produce have always resulted disastrously, if history is reliable. Still governments insist on dipping into the business of selling grain or of manipulating the market under the impression that they can accomplish even the impossible.

France, Italy and Germany have restricted the percentage of imported wheat which may be used in the manufacture of flour to the vanishing point. These countries are all anxious to sell their products to other nations but propose to avoid any purchases where humanity possible. Just so long as governments erect trade barriers to the extent in vogue at present the continuance of the present depression is inevitable. With the purchasing ability of all classes but the very rich curtailed by ruinously low prices and extremely high taxes and the nations trying to live on their own resources to the utmost limit, recovery will be delayed for a very, very long time.

It would be foolish to attempt to minimize the damage to crops of all kinds by the prolonged spell of hot, dry weather. That a largely decreased yield will result is inevitable, and will undoubtedly add to the increasing difficulties to be surmounted. That the grain survived as well as it did is more or less of a miracle, when the absence of sub-surface moisture is taken into account.

Skin plowing is advocated by the Beaverledge Dominion experimental sub-station as the first step when the destruction

of weeds is part of the object of summerfallowing, insuring as far as possible the germination of all weed seeds before plowing deeply.

The five cent bonus for wheat delivered at the elevators this year does not look as attractive as it did two weeks ago before the sun tried to burn everything up. Decreased bushels mean decreased bonus.

Preparations for the community exhibit at the Carmangay fair have been under way for some time. Naturally the gathering of an exhibit this year presents more than the usual difficulty, but the determination of the W. I. Committee to carry the matter out to the very best of their ability is to be commended. This district has received a great deal of satisfactory advertising as the result of the successful community exhibits at Carmangay.

Wheat has descended to price levels so low as to suggest there is no bottom to check its descent. The weather has been doing its best of late to prevent a wheat surplus this year and would appear to be fairly successful in the effort. Wheat prices should be rising, according to all beliefs and traditions instead of seeking new low levels.

From July 25 to August 6 of next year Regina, Canada, will be a Shrine of Wheat. Pilgrims from many nations will tread the streets of Saskatchewan's capital city for the first time attending the World's Grain Exhibition and Conference to be held there at that time. At the conference, with it various sessions, will be analyzed and criticized methods of marketing grain, costs of transportation, and the many varied problems with which the agriculturalist of today is faced. At the exhibition thousands of samples of grains from almost every grain producing country on the face of the globe will be on display.

### Cattle Moving To English Markets

In point of numbers, as well as in quality, the finest shipment of export cattle to leave the west for the Old Country, will clear from Montreal this week. The shipment, consisting of 614 head, was shipped by the ranches of Senator F. Burns Calgary, and handled in a special train over the Canadian National Railway, which made an excellent run, the cattle being delivered at the Union Stock Yards in slightly over thirty hours from the time they were loaded at Calgary.

# Heavy Distribution Of Fish Fry From Prairie Province Hatcheries To Stock Lakes And Streams

More than 470,000,000 fish eggs, fry, fingerlings, and yearling fish, and a few older fish, were distributed last year from the hatchery establishments operated by the Fish Culture Division of the Canadian Department of Fisheries.

There were Atlantic salmon, speckled trout, rainbow trout, brown trout, hybrid brown trout, a few albino brown trout, loach, venetian trout, salmon trout, cut-throat, Kamloops cross, cunawanie, landlocked salmon, pickerel, whitefish, sockeye salmon, spring salmon, coho salmon, chum salmon, steelhead salmon or trout, and Kennerly's salmon.

By such distributions, which go on from year to year, the Fish Culture Division assists nature in maintaining and increasing the existing supplies of fish in various Canadian waters, stocks lakes and streams which are barren, and introduces different species of fish into areas in which they are not indigenous, thus making more fish swim where fewer swam before and aiding both the commercial fisherman and the anglers.

The largest distribution was from the hatcheries in the prairie provinces. From the hatchery establishments in Manitoba there was a whitefish distribution of about 130,000,000 and a pickerel distribution of over 107,000,000. In addition, there was a salmon trout distribution of upwards of 180,000. From the hatcheries at Fort Assiniboia, Saskatchewan, nearly 15,610,000 eggs, etc., were sent out—whitefish, far the greater part, some pickerel and some brown trout. The distribution from the Alberta hatcheries reached a total of more than 103,250,000.

## Menace To Aviation's Future

President Of Aeronautical Federation Deplores Stunt Flights Across Atlantic

Trans-Atlantic flights of the hazardous variety are a menace to aviation's future, according to Prince Georges Bibesco, Aeronautical Federation president. "I protest against flights which do not serve the cause of aviation," said the Prince. "Only properly prepared long-distance flights by duly qualified pilots using suitably equipped machines can be of value to the future of aviation," he added, deploring "stunt" flights "by people who often have less common sense than a chicken."

"As President of the Federation," he continued, "my only idea is to protect aviation." Asked if trans-Atlantic flights could be of any value to aviation he replied in the affirmative; but, he said, "they must have a co-efficient of safety suitable to the radius of action, and far above the usual. If proper security is insured and the machines equipped to fly the distance required, trans-Atlantic flights can be of incalculable value."

By Annette

## May Make Shipments Of Cattle Monthly

Reservations Being Made With Council Of Western Beef Producers

Additional ocean accommodation recently made available to them will permit the Council of Western Beef Producers, with headquarters in Calgary, to ship creditable numbers of beef cattle to the British market in every month between now and January, 1932. Reservations have already been made by one rancher for space in the latter month, and many others are making their plans to forward their cattle under the auspices of the Council later this season.

Sixty head of light animals left Lethbridge recently for Glasgow, via Quebec, while 100 head of heavier weight from Bowden, Lethbridge, Camrose, and Tofield areas for shipment. These will about clean up the feed cattle controlled by the Council in this district, and subsequent shipments will be of grass-fed animals.

## To Ensure Fair Profit

Feed Must Be Included In Price Asked For Lambs

An average spread of \$1.54 between the cost of feeder lambs and the price at which they sell is necessary in this province, according to a table of production costs appearing in the current issue of the Economic section of the official organ of the agricultural economics branch of the Department of Agriculture. These figures were obtained from a close study of conditions reported by 16 representative feeders in southern Alberta. The two most efficient of this group of feeders kept operating costs down to 38 cents per head while the two least efficient showed a spread of \$2.54 per head. For the average feeder, a profit he must sell his lambs at not less than \$1.54 per head over their cost to him as feeders.

## World's Largest Steer

Weights 3,500 Pounds and Measures Over 10 Feet in Length

"Wonder" is the largest steer in the world. Lean, he weighs 3,500 pounds, and his owner, E. E. Hartman, believes that he can fatten him so that he will weigh 4,000 pounds. "Wonder" is seven years old and was born on the ranch of Ralph Clement, near Burwell, Neb. From the tip of his nose to the tip of his tail he measures 10 feet eight inches.

## Weekly Cattle Shipments

Southern Alberta Co-Operative Plan Regular Overseas Shipments

It is planned by the Southern Alberta Co-Operative to move overseas 50 to 60 head of cattle weekly from the Lethbridge district and arrangements for this summer are being made with the steamship companies. Growers are putting their cattle for export on sweet clover pasture and chopped grain rations which will put them in splendid shape for the trade.

## Winnipeg's Industrial Progress

Col. John B. Reynolds, vice-president of the Middle West Utilities Company of Chicago, states that Winnipeg's industrial progress has been noted in commercial circles of the United States. He congratulates Winnipeg on its method of organizing its facilities for development.

## JUST TAKE A PEEP IN THE SHOP AT THE ATTRACTIVE NEW COTTONS

It has so much snap, and it's so easy to make and to wear. It has two collars! The caplet covers the arms sufficiently to take the place of sleeves, and contributes its bit toward femininity. The scarf collar in matching tone of the ground of the print with decorative ends in red carries out the smart idea of tricolors.

The pointed turtleneck is slimming. Style No. 248 is designed for sizes 16, 18, 20 years, 30, 32, 34 and 42 inches bust. The 36-inch size requires 2 1/2 yards of 35-inch material and 3/4 yard of 18-inch dark contrasting and 1/4 yard of binding.

Plain crepe silk, eyelid batiste, chiffon print, batiste print, linen, and rayon novelties are only a few of the many smart fabrics. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## How To Order Patterns

Building construction in France is showing a slight increase

Laura Ingalls (above) diminutive but widely-known aviator, who was forced down by storms while on a proposed one-stop trans-continental flight from California to New York. She is expected to hop off as soon as weather permits, on a solo trip to Europe.

## Search Finally Rewarded

Eggs Of Harris Sparrow Found North Of Churchill

Discovery of the eggs of the Harris Sparrow, the last North American bird whose eggs have remained unknown to science despite searches ever more than a century, has been made by Dr. George Sutton, a Pittsburg ornithologist, who has returned from ice-covered wastes on the western shore of Hudson Bay.

Dr. Sutton's discovery came as the climax of a race with a group of scientists of the Canadian Ornithological Society, while both expeditions were camped less than a mile apart. For nearly three weeks the groups raced to be the first to find the last link in the chain of more than 1,200 known birds of this continent.

The eggs, smaller than those of robins, pale green, with mottled brown markings, will be presented to Carnegie Institute. They were found in a rhododendron-like bush near the ice, 40 miles north of Churchill, Man., on June 16.

The expedition spent two months in the Arctic, collecting birds, plants and insects. Its members, besides Dr. Sutton and Sutton, were Bert Lloyd, Saskatchewan ornithologist, and Olin S. Pettigill, photographer, of Boston College.

## Gathered Up Some Gold

Chinese Miner In B.C. Had An Exciting Experience

Carried three-quarters of a mile when he first hit into a flume with a fifteen-mile current at the Lowhee Hydraulic, Barkerville, B.C. Chinese miner, had a narrow escape into the tailings at the end of the flume.

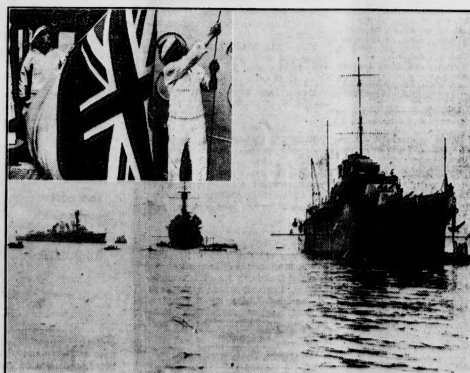

Probing a deep wound over one eye in the hospital at Quonset, R.I., later, Dr. H. G. Baker, removed a quantity of gold-bearing black sand and a fair sized nugget embedded there when the face of the Chinese struck the rifles at the bottom of the flume. His body was literally covered with abrasions.

"Extrem too much water," was his only comment to the doctor.

There was once a man so good at languages that he could translate the American dialect as it came in over the radio.

To make cellars more attractive, heating engineers are now making furnaces in pastel shades.

## BRITISH FLEET VISITS GERMAN HARBOUR

For the first time since the Great War the British Fleet paid a visit to Kiel Harbour, Germany, and was enthusiastically received. The main picture shows the new British cruiser "Norfolk" nearest camera, at right, at her moorings with the German ships, "Königsberg" and "Karlsruhe" on the left. Inset shows the hoisting of the British Ensign on the "Schleser Holstein" by German sailors in honour of the British Fleet's visit.

# Alberta Society Of Artists Is Formed With Object Of Raising Standard Of Art In Province

## Method Was Simple

Invention Of Dr. Babcock Revolutionized The Dairy Industry

Dr. S. M. Babcock, whose invention 41 years ago of a simple way of finding the amount of butterfat in milk revamped the whole dairy industry, is dead. He was 88 years of age but had been still working away on various research problems at his private laboratory at Madison, Wis., where he had been almost a recluse for many years.

Born and schooled in New York State he joined the staff of the University of Wisconsin in 1887 and the first announcement of his invention came three years later. Its importance lay in the fact that it brought full value for the product of his herd to the farmer who kept high grade stock, whereas formerly he had received from the creamery no better price than had been given the seller of an equal quantity of milk of low content. It also protected the manufacturing end of the dairy interests in that it made adulteration or watering of milk by dishonest farmers easy of detection.

Dr. Babcock's method, like many other important discoveries, was the embodiment of simplicity. Under it a given amount of milk is sampled from the producer of a farm, poured into a graduated beaker or test tube, an equal amount of sulphuric acid is added, and within a few minutes the butter fat has come to the top with its amount indicated by the standard markings on the tube. Another benefit of this discovery was the improvement in dairy stocks which it made certain. It became easy for the farmer to determine whether a given cow should be retained in the herd as a money-maker and mother of future income, or sent to the butcher.

## Value Of The Newspaper

Use Of The Columns Of The Local Paper Best Aid To Business

The director of a well known mercantile establishment describes the local newspaper as "our best clerk." He explains that it sees more people, gets more of their individual time, works longer hours, and tells its story with more accuracy than any other clerk can employ. These papers are going into the homes of people, and are assured of their friendly attention. This is proved by the tremendous growth in importance of the press in the last few years, according to the director, who declares that today the local newspaper is the backbone of any constructive sales effort.

## Professor Makes Hot Ice

"Hot ice" is the product of an amazing scientific experiment recently made by Prof. P. W. Bridgman of Harvard University. With a machine that exerts a pressure of 600,000 pounds to the square inch, Prof. Bridgman makes "ice" that is as hot as a cup of steaming coffee and boils eggs by compressing them. In Prof. Bridgman's machine hardened steel flows like putty.

A machine that cuts wood into matches turns out 40,000 splints a minute.

Worried by crop deterioration and prices depression the west has not forgotten art.

Recently a chair of music was established at the University of Saskatchewan and now Alberta has organized a society of artists, with headquarters at Calgary and branches at Edmonton and other points.

Announcement of the formation of the Alberta Society of Artists is made by Dr. W. G. Carpenter, director of the Institute of Technology and Art. No members have been elected as yet, and it is anticipated that only two or three will be named during the first year. Adjudication by eastern Canadian, British or United States experts has been promised for works by aspiring artists.

One of the chief activities of the society will be to organize and assist art clubs and sketch clubs in cities, towns and villages throughout Alberta. Members will be asked not necessarily be members or associate members, but the society will sponsor or present exhibitions of amateur and professional work in competitions in art after the manner followed by musical festival organizations for promoting students.

Alberta for display not only in larger centres but in the smaller towns. It plans to establish an art gallery and to present exhibitions of amateur and professional work in competitions in art after the manner followed by musical festival organizations for promoting students.

"For many years educators in Alberta have felt that the standards of art should be raised in this province," states Dr. Carpenter. "At the institute we feel that the development of art should be raised in this way by an outstanding and youthful leader—a man whose personality and interpretation could be used as a foundation on which to create an entirely new school as distinctive in character as the Italian, Flemish, English or Dutch schools. We believe that such a personality in A. C. Leighton, R.B.A."

## Conference On Grain Production

Important Meeting To Be Held In Conjunction With World's Grain

The conference on grain-production and marketing, to be held in conjunction with The World's Grain Exhibition in Regina next summer, may prove to be the most valuable and ultimately the most important part of this world event," stated H. S. Fry, Saskatchewan Wheat Pool Publicity Director, addressing the opening session of the annual convention of the Canadian Weekly Newspapers Association. He mentioned that a programme of the various conference sessions is being prepared under the chairmanship of Dr. J. H. Orsiddle, Deputy Minister of Agriculture at Ottawa.

## How He Understood It

A young lad of six years got to pondering about Biblical matters recently and came to his mother to ask her exactly why Christ was killed, she happened, however, to be busy at the moment; moreover, she didn't want to get him embroiled in philosophical affairs too early in life. "He was killed," she explained, "because the people didn't understand him," and thought she'd got away with the thing rather neatly—until a day or so later. Then she came upon him in the nursery, solemnly explaining to a playmate that Christ was killed because He couldn't speak English.

## First Place In Butter Exhibit

One of seventy-five competitors, the largest exhibit ever made, Manitoba took first place in the butter exhibit at the recent Brandon Fair.

"Ah, now I have again forgotten what it was I remembered that I had forgotten."—Kasper, Stockholm

## Don't Let Constipation Lead You Into Serious Illness

Serious renal troubles, piles, paralysis, hemorrhoids, are frequently the result of using cheap cathartics.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO in a glass of water every morning, tones up and sweetens the entire system.

# ENO'S FRUIT SALT

## Our National Parks.

One little item of national good which seems to have grown out of the prevailing and much discussed business depression is the increasing number of Canadians who are this year making visits to and holidaying in the National Parks of the Dominion. This very satisfactory development may have been caused by the financial inability of many people to indulge in more expensive trips, probably so, but it may also have resulted from increased publicity and a growing appreciation of these parks and the wonderful variety and beauty of scenic and other attractions which they present.

Canada, like all countries, has made some very good as well as some regrettable but, in an other department of national administration has more brought been shown, or a better investment made than in the setting aside in all provinces of generous areas as national playgrounds, and leaving them, for the most part, in a state of undisturbed natural beauty so that future generations in the centuries to come may know what this country was like before it became the home of teeming millions with all the artificialities which invention and an ever advancing machine-age may make.

As a result of this foresight, Canada today can boast of the largest and finest system of National Parks possessed by any country in the world. Embraced within their boundaries are great mountain peaks, wild lakes, wonderful rivers, beautiful waterfalls, almost every kind of wild animal known to this northern half of the continent, fish, trees and wild flowers of every variety. They are, in a word, Nature's great storehouses of natural wealth and beauty.

More than this, each National Park is an animal and bird preserve and sanctuary, thus providing a guarantee against the extinction of these wild species in this country and safeguarding Canada from similar losses sustained in other lands. In fact, Canada has done even better than this. Not many years ago people declared that the buffalo, once roamed our western prairies in countless thousands had become extinct. There were, however, a few held in captivity by private individuals in the United States. The Canadian Government, with foresight, seized the opportunity and purchased these animals, about 800 in all, twenty-three years ago, and brought them to Canada, placing them in the National Park at Watkinsburg, Alberta. Today there are 6,000 buffalo at Watkinsburg, 1,000 at Elk Island Park, Alberta, and about 13,000 at Wood Buffalo Park, Northwest Territories. All these herds are increasing.

Canadians thus have not only great national playgrounds but Nature's own zoological gardens. They constitute a national asset of great value today, which money could not buy, and which will increase rapidly in value with the passage of time. Full advantage of the National Parks should be taken by all citizens. They are easily accessible to most people, if not on foot, then by motor. In a year such as the present they offer the ideal holiday for people with but few dollars to spare. Take the children to them. Let them see the buffalo, the elk, the bison, the moose, the prairie dog, and not merely by picture in school books. Let them, especially our prairie boys and girls, know the joy of roaming among the trees, and the keen delight of fishing.

Western winters are long, and sometimes excessively cold, when we must be cooped up in our houses. Therefore, let everybody get out of doors when and where they can, and revel in the beauties and health-giving attributes of Nature. Adults will appreciate most the beauty of the country, but the child it is a duty we owe to the children. Nature is the best doctor in the world, and we should go to her as often and for as long a visit as possible. And Nature can be seen at her best, and enjoyed to the utmost, in the National Parks of Canada—the great playgrounds which are the property of every Canadian citizen.

## States Cannot Claim Hawks

Famous Aviator Born in Australia Is Still British Subject

Just as a matter of record, without causing any reflection or making any insinuations against anyone, may it be stated that Captain Frank Hawks who recently cut the flying records from Montreal to Toronto, Toronto to Ottawa, and Montreal to New York, is not a United States citizen. He is an Australian and, therefore, British. His temporary home at present is in the air most of the time can be said to have any home is in Texas; but he is, and so far as we know has no intention of remaining a British subject. So when next time your friend on the golf links or at the club talks about "Hawks, the American," please remind him that an Australian is not yet a citizen of the neighboring republic.—Toronto Mail and Empire.

London women have a hatless era.

## Suffered Severe, Painful Cramps In Her Stomach

These terrible cramps in the stomach that double you up in pain and make you break out in a cold perspiration, may be stopped by a few doses of Dr. Fowler's Extract of Wild Strawberry.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.S., writes:—"I have suffered greatly from severe and painful cramps in my stomach. I tried several remedies without result. One day a friend advised me to take Dr. Fowler's Extract of Wild Strawberry, so I bought a bottle and got instant relief."

## Alberta Road Program

Work On Link With Trans-Canada Highway To Proceed

Construction work on the Alberta section of the proposed Trans-Canada Highway will begin in the near future. It was intimated by the Provincial Government.

"Announcement of the road program was made following receipt of a wire from Senator Gordon Robertson. Federal Minister of Labour stated not only that the Dominion Government will share with the Province on a 50-50 basis in the case of the trans-Canada Highway, but that the Province may confidently anticipate a Federal contribution on highway construction in other areas.

Three possible routes an Alberta links in the highway have been suggested in answer to a request from Premier Bennett, as follows: Jasper, Edmonton and Lloydminster; Jasper, Edmonton and Watkinsburg; and Banff, Calgary and Medicine Hat. When a choice as between these is made by the Dominion authorities, coming up with the route across the adjoining provinces, the way will be clear to begin actual operations.

## Bounty On Wheat

Five Cents On Bushel Exported From Alberta and Saskatchewan

A resolution providing for the payment of five cents on every bushel of wheat exported from the Provinces of Alberta and Saskatchewan, in the present year has been placed on the order paper of the House of Commons by Premier R. B. Bennett. This implements the announcement by Premier Bennett in his budget speech.

The resolution read as follows: "Resolved that it is expedient to bring in a measure to provide that the Governor in Council may authorize the payment out of the consolidated revenue fund of the sum of five cents on every bushel of wheat exported from the Province of Alberta and Saskatchewan of the crop of 1931, and to make provision for the determination of amounts payable therefor, and for regulations to carry out act and prescribe penalties to be incurred for breach of the act or regulations."

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to be the most popular and increase its sphere of usefulness. It is a sterling quality has brought it the front and kept it there, and it can truly be said that it is the best oil in the world for its purpose and it would use no other preparation.

## Abandon Rural Fairs

Sixty-nine Agricultural Fairs In Saskatchewan Will Be Cancelled For This Year

Due to poor conditions, 69 agricultural fairs have been abandoned in Saskatchewan. J. G. Rayner, secretary of the Saskatchewan Agricultural Societies Association and director of extension work at the Saskatchewan University, has announced. "Altogether 69 small exhibitions will be held this year. Most of the fairs which will not be held lie in southern Saskatchewan where the weather is the worst. The northern societies have decided to put off the fairs, due to lack of prize money."

Your Asthma, Too. The efficacy of Dr. J. D. Kellogg's Asthma Remedy is something that is more to be hoped for; it is to be expected. It seldom fails to bring relief, and in your own individual case it will do the same. So universal has been the success of this far-famed remedy that every one afflicted with this disease owes it to himself to try it.

## Deaths By Violence

Increase Of Two Persons Per 100,000

Population Is Shown An increase of two persons per 100,000 population in the number of deaths by violence is shown in a report issued by the Dominion Bureau of Statistics. The number of deaths by violence in Canada for 1930 was 7,468 as compared with 7,151 in 1929. Suicides numbered 4,007, a marked increase over 835 for the previous year, while homicides numbered 212 as against 185.

There were 6,949 accidental deaths, compared with 6,134 in 1929. Drownings numbered 1,057, deaths from traffic accidents 3,077 and automobile fatalities 1,289.

Western Market For Strawberries Extension of the home market and capture of a western market are foreseen for Ontario strawberries as a result of "chilling" experiments recently at the Simcoe Cold Storage Plant. Contracts are now being made by the Simcoe plant with growers to ship the bulk of next season's crop to western provinces and northern Ontario.

If the way of the transgressor is so awfully hard, why is it so many people follow it?

W. N. U. 1930

## Wheat Marketing Problems

Premier Bracken Of Manitoba Pleaded With Outcome Of Regina Conference

Commenting upon the two-day inter-provincial wheat conference held in Regina, Premier John Bracken, of Manitoba, expressed himself as well pleased with the outcome, and confident that the conclusions arrived at, the steps taken to implement them would result in the creation of arrangements and machinery which would solve some of the most important problems connected with the operation of the pool elevator system and wheat marketing.

While expressing hearty appreciation for what steps the Dominion Government was prepared to take by way of financing the handling and marketing of the 1931 crop, Premier Bracken keenly regretted that the Federal authorities could not see their way clear to accept the unanimous recommendation of the three prairie governments, and all the farm organizations of western Canada, that a wheat board be created to market the new crop. He stated further, that he was firmly convinced that a wheat board would be the soundest solution of the immediate wheat marketing problems and the best possible contribution to the serious economic emergency which exists in western Canada.

He was confident that the wheat pool was an upward trend, and that the selling pressure, at this fall was past, at which time the price effect of a number of fundamental factors corrected in the wheat situation would become apparent.

Continuing, Premier Bracken stated that the vast majority of western farmers would be compelled by dire economic circumstances to market their 1931 crop as quickly as possible, at the very time Russia will be obliged to market the larger part of whatever her exportable surplus may prove to be. The generally admitted absence of speculative investment buying to absorb the hedging pressure with the bearish influence of the uncertainty of the Russian situation, will in all probability mean lower prices at the time our farmers are delivering their crop than during the recent months of the year, with serious resultant disappointment to those farmers who see prices on an upward trend before the control of their grain has passed beyond their hands.

## First Aid Prize Awards

Championship This Year Goes To Kingston Army Medical Corps "First aid" championship of Canada has been won this year by a team representing the 3rd Detachment of the Royal Canadian Army Medical Corps, Kingston, Ont.

Winner of the 1931 Dominion Trophy competition, conducted by the Canadian branch of the St. John Ambulance Association, show the R.C.A.M.C. team compiled a total of 291 points in the tests, as compared with 266 by the second ranking team, the 1st Canadian Mounted Rifles of the Pacific Railway police at Windsor, Station, Montreal.

Other competing teams in the order in which they finished and their point scores follow:

The Canadian National Railway's team of first-aiders, Winnipeg, 279; fourth, C.P.R. team of Nelson, B.C., 268; fifth, C.P.R. team of Saint John, N.B., 250; sixth, Camrose Coal Company team No. 1, Camrose, Alta., 247; seventh, C.N.R. M.P. dept. team of Melville, Sask., 217.

## Fighting Narcotic Evil

League Of Nations Reports Progress In Control Of Drug Traffic

The League of Nations experts have placed the amount of morphine which has passed into the illicit traffic between 1928 and 1930 at 100 tons. To this amount they also add six tons of cocaine.

Other statistics, however, demonstrate that actual progress is really being made to control the drug evil. Reports of heroin, for example, into 14 countries, which are generally regarded as the centers of the illicit traffic, have fallen from 3,005 kilograms in 1926 to 41 kilograms in 1930 as a result of the League's efforts.

## Ontario Relief Plan

Accord with the views of Hon. George Henry, Premier of Ontario, in connection with the establishment of labor battalions in that province was expressed recently by Hon. Clendon Robertson, Minister of Labour. The Minister, however, made it clear that no suggestion of compulsory work was associated with the method the Premier proposed to employ.

It is all very well to say that the speed must go, but the trouble is that that's what he thinks, too.

## Homeland Sends Greetings

London Papers Refer To British Columbia's Diamond Jubilee

"Hall British Columbia" is the heading of the London, England, Morning Post Leader in a recent issue referring to British Columbia's Diamond Jubilee as a province of Canada. The Post says the homeland sends affectionate and sincere good wishes to the province. It pays a tribute to the loyalty of British Columbia and recalls the courage and far-sighted vision of the pioneers of British Columbia, the progress and prosperous communities in the Empire."

The Daily Express also congratulates British Columbia on its diamond jubilee, and says: "Perhaps other provinces of our great Dominion may be jealous if in this country we have special affections for the 60-year-old province beyond the Rockies owing to their starting habit of remaining as English as possible."

## Peace River Outlet

B.C. Government Fears Project May Be Delayed

The British Columbia Government has intimated, views with concern the fact that the fate of the Peace River outlet question and the future of the Pacific Great Eastern Railway may be delayed in its decision by reference to the proposed Dominion general transportation royal commission.

While favoring the appointment of such a commission for general purposes, the government does not wish these two questions to be subjected to delay. The provincial authorities, it is stated, will communicate with the Dominion Government to learn whether these matters would be referred to the proposed commission.

Toothache and neuritis are instantly relieved by Douglas's Egyptian Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

## Canada Praised

Sir Alexander Gibb

For Wishing Efficient Management and Construction Of Harbours

Sir Alexander Gibb, noted civil port authority and engineer, who has been commissioned by Canada to conduct an investigation into the functioning of Canadian harbours, arrived at Quebec recently. Sir Alexander stated that Canada was giving an example to other countries in wishing efficient management and construction of her harbours. His task was of the highest importance, he said, adding that he felt honored in having been chosen to conduct the inquiry.

## Light Cattle Wanted

Canada must produce more lightweight beef cattle to hold its market in Britain and to take care of home consumption countries. Howard P. Raleigh, M.L.A., Lambton West, in a report prepared for the agricultural committee of the Ontario legislature, following an investigation of the conditions surrounding the cattle-breeding industry.

## ZIG-ZAG Cigarette Papers

Large Double Box 100 Cigarettes. First Five Cans Buy 50 CIGARETTES. 50% OFF.

## Coast-To-Coast Telephone

Trans-Canada Telephone Line Will Be 4,383 Miles In Length

Direct telephone communication between Montreal and Winnipeg is now established, and marks the closing of another gap in a trans-Canada telephone cable entirely within the boundaries of the Dominion. The trans-Canada telephone line will be 4,383 miles in length, made up of 142 miles in Nova Scotia, 283 in New Brunswick, 1,932 in Quebec and Ontario, 241 in Manitoba, 465 in Saskatchewan, 118 in Alberta, and 569 in British Columbia. A total of 22 repeater stations will be necessary to boost-up the electrical impulses that carry the voice on its long journey across Canada.

Immediately preceding the opening of the Montreal-Winnipeg connection on July 4th, a third commercial line from Toronto to Winnipeg and one which provides direct communication, was from intermediate switching at any point en route, was brought into use. The first service between Toronto and Winnipeg was established in 1928, and two of the circuits now in operation are equipped with carrier current apparatus, permitting several simultaneous conversations on the same pair of circuit wires.

The eastern link of the system between Halifax and Montreal was completed in January, 1929, and the recent hook-up completes the line from Halifax to Winnipeg. Much work has been done in this connection in Western Canada, a three-channel carrier system already operating between Regina and Calgary, and the work laid out by the provincially-owned system of Manitoba, Saskatchewan, and Alberta, together with the British Columbia Telephone Company, provides for the opening of the whole line this year.

Promotion Well Merited Twenty-two years of service with the Royal Canadian Mounted Police (a good deal of which was put in by the provincially-owned system of Manitoba, Saskatchewan, and Alberta, which took him at one time into the Arctic regions in northern Canada for a period of two years, has brought Sergeant William Shuts of Weyburn, a well merited promotion to the rank of an inspector.

Complete In Itself, Mother Grass' Worm Extirminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

The reason so many people miss the road to happiness is because when they come to it, it looks so much like detour they take the better-looking side.

## Cut Down Food Wasteage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them. You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

## THE DUSTY HIGHWAY

BY  
CHRISTINE WRIGHT  
PARMENTER  
Copyright 1929

CHAPTER XXIV.—Continued.

"I'd be proud to be thought in the same class," retorted Nick. "He's a real man. And we'd be suffering now if he hadn't known that most of these islands have no running streams. He saved every drop of water aboard the 'Sea Bird'; but if we're not picked up in another week someone has got to go—or die a wretched death."

"Fifteen minutes, perhaps; but what else is there to do now that the yacht has gone to pieces on the bar?" Myer could send the men, of course, but he'd rather be doing something for you object if I even build a fire! Do you want to spend the rest of your life here?"

"I hate it! And you're not even decently polite."

Her childishness made Nick grin, and restored his good humor.

"I wonder," he said, "if Robinson Crusoe was a Chesterfield! I'm sorry if my manners offend you, Angela, but I admit that I feel on edge today, and want to get off by myself. I can't get Gay out of my thoughts, and how she must be suffering. Perhaps the 'Sea Bird' wasn't mentioned in the papers; but it's long past the time when I should have been back, and it makes me crazy—it makes me wild—to think—"

He broke off suddenly, and strode away. Angela started after him, then stopped, and looked down at her clean white shoes. For no toilet reason—nothing that could add to her personal adornment, even shoe polish, had been left behind when the "Sea Bird" was abandoned. Angela at once recollected herself, and with a sigh, she went to the chest of drawers and pulled out a pair of her mother's plain black shoes. She rebelled at the thought that in another month her own clothes would begin to appear grimy. Now, although she really longed for a tramp with Nick, she could not endure the thought of soiling her daintiness, and he was evidently in no mood to wait while she changed to something suitable.

Angela sank down on a seat that the despatch captain had cleverly constructed from a barrel, and gazed gloomily out to sea. It was a scene of enchanting loveliness, but she looked up at it with blind eyes. She was thinking of Nick, angrily, and with a sense of helplessness. She admitted that she had never worked hard to gain a conquest—yet she had evidently failed. She felt baffled—unfulfilled—crushed and utterly miserable unhappy. It made her furious that a quiet little man like

## CORNS

Lift off - No Pain / QUICK RELIEF

Just a drop or two of Putnam's on any corn and out comes all the corn. No pain, no itching from hot shoes. You can dance or walk in comfort. Use only Putnam's corn extractor. Sold by druggists everywhere.

## SCOTLAND

Here is a never-failing form of relief from sciatic pain!

Take Aspirin tablets and you'll avoid needless suffering from sciatic—leg-hago—and similar excruciating pains. Just make sure it is genuine.

**ASPIRIN**  
TRADE MARK  
Made in Canada

What she had gone through for little Nick—thinking—perhaps, that he was never coming back to her.

Nick turned, burying his face in his arms, longing for the relief of tears that would not stir. Then came a thought that filled him with despair: Angela had known! No maid had reached them since leaving Kingston. He had had to wait all the time, and had let him start out upon this cruise knowing that his life was at home. How could she? Had she no sympathy for Gay?—no understanding of her need of him? Even though Angela had never had a child, looking out to sea listened so intently that he had understood, no cruise however alluring would have tempted him to desert the coast of Maine, a subject which, for some mysterious reason, always put Angela on edge.

He remembered, as he tramped along, if her distaste for the subject had anything to do with that horrible night when the Colonel had returned, and the night before the hurricane—had the night Angela had kissed him. He had hardly thought of it since. There had been too much else to think about; yet the whole thing was queer; her behaviour after the story—the way she had looked at him, and how she had kissed him, and the kiss—mostly the kiss. It struck him for the first time that she was subtle, and he had not been so. What was it that Angela had said about not trusting Angela Halliday?

As always, the thought of her was like the touch of a cool hand, then the realization of what she was, and that he had reached the point of land where he had meant to pile brush for a signal fire. He paused, and looking out to sea listened as an exclamation of incredulity. He shaded his eyes with his hand for a long moment, then turning with furious haste, began making a pile of leaves—of twigs or branches—of anything that would burn, working like mad before the wind, and gasping not more across the water.

Faint, almost imperceptible, yet near as the wind, came the sound of a spiral of smoke was visible against the horizon.

(To Be Continued.)

Miller's Worm Powders are a pleasant remedy for worm-infestation in children, and they will take it without objection. When directions are followed, there is nothing of an unpleasant nature about it. A child who will swallow pills is a child of little suffering whose vitality has become impaired by the attacks of these internal pests.

## Appliance For Railroads

Latest Marvel Detects Invisible Cracks in Steel Rails

Railways can now have the services of an electrical appliance that will detect invisible cracks in steel rails, a condition that has caused so many wrecks in railroad history that it has become known as "rail cancer." This latest marvel was worked out by Emory G. Sperry, 3700 Wizard, just before he died a few months ago. Recent tests have proved that the application of electrical current, assures are disclosed that otherwise would grow until the rails fell apart.

## Would Not Change Places

"What wages would you want?" asked a district farmer at a prospective hired man in the employment office at Stratford, Ontario. "Thirty dollars per month," was the reply. "I'll tell you what I'll do," said the farmer. "You take the farm, work it the same way I am doing and I'll work for you \$30 a month."

The prospective hired man declined the offer.

## Good Word For Canada

"If I were a young man with my future before me, I would go to Canada," said Rt. Hon. Stanley Baldwin, Britain's Conservative Leader, in the course of an address at Hull. He was referring to unemployment, and expressed the hope the industrial field overseas might offer a good home, and perhaps a better life than he had in his own country. He said that many of our people had been able to maintain here.

## Will Follow Viking Route

MacMillan Plans To Fly To Iceland By Way Of Labrador and Greenland

Donald B. MacMillan, veteran Arctic explorer and perhaps the most famous of all American navigators who have spent years of research and discovery in the land of the midnight sun, has decided, for the present at least, to cancel the plans he had made previously concerning a flight to London, England. The veteran explorer had hoped to carry postcards and covers on his flight to the greatest city in the Empire, the proceeds from which it was planned to be used in the educational work conducted by the commander in Labrador.

Although the explorer was sorry that he could not carry out his original plans, he announced that he would make his aerial survey as was ordered before, and in stating his decision to continue the second part of the flight as originally planned, Commander MacMillan said the purpose of his flight were as follows:

"One is an aerial survey of northern Labrador, which is really a continuation of my work begun in 1927 and in my way is intended as a demonstration of the practicality of a survey of the air route to England. My interest is not in any proposed route or in trans-Atlantic flying. I am interested in making a map of the coast of 40 Eskimo kiddles in Labrador and in the work carried on for 100 years by the Moravian missionaries. That is one reason why my schooner 'Bowdoin' leaves for Labrador to make a map of the poor people of the story of America, and their home in Greenland and Iceland. Therefore, I am planning to fly to Iceland by way of Labrador and Greenland."

"This year the 'Bowdoin' will be used for the work of surveying part of the Labrador coast in connection with the aerial survey. He hopes to complete the map of the coast of 40 Eskimo kiddles in Labrador and in the work carried on for 100 years by the Moravian missionaries. That is one reason why my schooner 'Bowdoin' leaves for Labrador to make a map of the poor people of the story of America, and their home in Greenland and Iceland. Therefore, I am planning to fly to Iceland by way of Labrador and Greenland."

## Error Discovered In Time

Tablet In Memory Of Dickens Almost Placed On Wrong Building

A tablet unveiled in Montreal on May 10 to commemorate the fact that Charles Dickens had lived at Racine's Hotel during his visit to this city in 1852, past president of the Montreal World Building had it not been for Dr. A. H. Atherton, professor of English at the University of Montreal, and past president of the Montreal branch of the Dickens Fellowship in North America.

A few years ago, a well-known French-Canadian artist painted a picture entitled "Racine's Hotel, Bonsecours Street," which showed a little picturesque, tumbled-down building. The Montreal Dickensians, recalling that Dickens had boarded at Racine's Hotel, and past president of the Montreal branch of the Dickens Fellowship in North America, had a copy of the picture shown at a Dickinson meeting at which Dr. Atherton was present.

"What's that? What's this?" exclaimed the doctor. "Racine's Hotel, Bonsecours Street? Racine's Hotel is not in Bonsecours Street. It is in St. Paul Street."

Astonished officials of the Montreal branch at once hurried to the spot and found that the doctor was right. There in St. Paul Street they discovered the real Racine's Hotel, not a small, dilapidated building, but an imposing stone structure, whose identity was further emphasized by the fact that it had its name in great relief letters on the front facade.

Dinner: "What sort of pudding is this?"

Waitress: "We call it cold pudding, sir. Like it?"

"No. I'm afraid there's an egg in it that ought to have been expelled."

An instrument has been invented to measure the force of an earthquake.

"I'll tell you what I'll do," said the farmer. "You take the farm, work it the same way I am doing and I'll work for you \$30 a month."

The prospective hired man declined the offer.

## Good Word For Canada

"If I were a young man with my future before me, I would go to Canada," said Rt. Hon. Stanley Baldwin, Britain's Conservative Leader, in the course of an address at Hull. He was referring to unemployment, and expressed the hope the industrial field overseas might offer a good home, and perhaps a better life than he had in his own country. He said that many of our people had been able to maintain here.

## Flaws In Steel Rails

Remarkable Instruments Detect Defects In Rail While Moving At Full Speed

Looking into steel rails for invisible flaws, two remarkably equipped cars have been travelling over western lines of the two Canadian transcontinental railways during the past few weeks.

Moving at a fair speed over the rails these rot detectors mark the invisible faults that might cause a split rail, and forever damn the guilty rails in the eyes of section crews by automatically painting them white.

Invented by the late Mr. Sperry, these cars are loaded to railways by Sperry Rail Detector Company of New York. Each carries its own chief operator and motor. Over every section of track covered, the local section foreman follows with his gang, to make immediate replacements.

## THE RHYMING OPTIMIST

By Aline Michaels

WIND FROM THE SEA

Tonight the wind is from the sea And bears the fang of snail to me. Just here, the honeysuckle grows, And here the trellis with the rose. Stands close beside the garden gate To tempt the passer with its freight Of wine-scented, petalled loveliness. The daisies in their snowy dignity Along the pathways nod and bend As gracious women greet a friend. Yet when the wind is from the sea It brings strange messages to me, I feel, within, a sudden need Of stinging spray and drifting weed— Of sea-weed red as any rose. Tossed lightly where the strong tide flows.

As would know the press and surge Of ocean in its restless urge! Tonight the wind is from the sea! What can the roses say to me?

## Aeromobile May Be Speedy

Vehicle Driven By Air Propeller Invented In Germany

Great speed at low cost is expected from the aeromobile, the machine recently invented by two German inventors. The vehicle is described by them as an automobile driven by an air propeller. The air screw lies horizontally on the back part of the chassis. Above it are several parallel plane surfaces forming a sort of lattice-work arrangement, the angle of which may be altered. The air stream produced by the propeller breaks through these surfaces, providing the driving power.

## Minnesota In The Lists

Preparing To Enter Exhibits At World's Grain Show

Minnesota producers are getting ready to enter the lists against other countries in the competitive classes of the World's Grain Exhibition and Conference to be held at Regina in 1932. A campaign is now being conducted by the Minnesota Crop Improvement Association among its members with the purpose of encouraging them to prepare special plots so that they may secure high class samples to enter in the various classes.

"Mothers have a pretty bad time."

"Well, they're always afraid that some girls will marry their sons and that some men won't marry their daughters."

"What are Smith's two daughters leaving?"

"The elder is terribly simple and the younger is simply terrible."

## Little Things For This Week

"The Lord bless thee, and keep thee; the Lord make his face shine upon thee, and be gracious unto thee,"—Numbers vi. 24, 25.

Not having thee, what have my hands to do with thee, nor Lord, nor would I be.

Possibly of heaven, heaven unpossessed of thee.

There is no hellness if the Lord withdraw His presence; no wisdom if His Spirit ceases to direct. In our condition there has been a good deal as the spirit upon the mountain; but in God we have the stability of the throne in heaven. Kinde, O Lord, our hearts with light and life by the holy fire of Thy love and blessing.

—Thomas A. Kemps.

## Dehydrated Apples

Stocks On Hand In The Okanagan Valley Now Practically Exhausted

Stocks of dehydrated apples in the Okanagan Valley have practically been exhausted. Only very small amounts are in the hands of packers. Since fresh apples have not been available there has been a good demand for the dehydrated product. Retailers who small quantities are now on hand, not over 2,000 boxes, all told, are in the hands of evaporators.

Pedrian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexion of surprising loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A perfect toilet requisite. Invulnerable to the wear and tear of care for elegance and distinction.

## Abattoir For Saskatchewan

The Saskatchewan Livestock Producers have arranged to build a small abattoir in Saskatoon costing approximately \$75,000.

Next flytag has been introduced for the first time regularly on a British commercial air route.

Cactus plants, which now are spread through many parts of the world, were American natives.

## Took it Before Childbirth

"I felt much stronger"

FIRE'S TROUBLE Lydia E. Pinkham's Vegetable Compound is what I was weak. After taking it, I felt much stronger. I could get my hair and I could do my work.

I have used the Vegetable Compound for eleven years off and on whenever I need a builder and restorer of my system. Mrs. Emily Schindler, Renown, Saskatchewan.

This is only one of thousands of letters praising this simple, home remedy and recommending it to women who need a stronger body.

VEGETABLE COMPOUND

Truck Driver: "Accelerate? Of course I accelerated. What did you think I was going to do—stand still and let you smash me up?"—The Humorist, London, England.

## WORLD HAPPENINGS BRIEFLY TOLD

The mineral output in South Africa in a recent month was valued at nearly \$20,000,000.

There were 26 concentrated milk plants in operation in Canada in 1932 whose value of output totaled \$13,604,743.

British Columbia lumber circles are organizing to take immediate advantage of market extension possibilities thrown open by the new Canadian-Australian trade treaty.

A periscope, designed to fit a man's hat, enabling him to see a band, should one sneak up behind him, will be shown at the international patent exposition in Chicago.

A small bear, an owl, and 20 quails formed part of the cargo of an air freighter that arrived at Croydon, England, from Paris, France.

An exceptionally fine copy of the first edition of the works of Chaucer, the poet, printed in 1532, was sold for \$11,250 at an auction sale recently. Despite keen bidding from United States dealers the prize was secured by a London dealer.

The gold medal and diploma for creamery butter, in the largest exhibit of its kind ever shown at the Saskatoon Exhibition, went to Manitoba Co-Operative Dairies, Winnipeg, with a score of 183.5.

Two Japanese dailies in Dalnair, South Manchuria, the Manshu Shinbun and Dairen Shinbun, have started to issue Sunday evening papers in addition to their regular morning and evening papers every day.

It is not at present possible to tell when a policy regarding a new French River outlet will be enunciated. Hon. R. J. Manion, Minister of Fisheries and Canals, said in the House of Commons.

Miss Millie Orpen, who was awarded \$25,000 in a suit against a movie theatre, which remained open on Sunday in violation of a blue law, more than a century old, renounced the award and said she never had intended to collect it, but used only as a test case.

## Winnipeg Newspaper Union

By Annette

It's made in a jiffy. Practically only four seams to join! The youthful V-shaped neckline is most becoming. To begin with there is an inset vester with a softly falling jabot drill and attached in deep rever styling. There is still another point, the interesting novel envelop pockets. The removable belt may be worn at line best suited to wearer. Style No. 750 is designed for sizes 16 years, 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 2 yards of 35-inch material with 1/2 yard of 35-inch contrasting.

It has many possibilities for contrasting effects. Yellow and white dainty print with plain cocoa brown dainty in individual and smart.

Striper blue linen with white pin dots and plain white trim is so attractive. Printed lawn, shantung, shirting fabrics and gingham are lovely suggestions.

Price of pattern 25 cents in stamps or coin (both preferred). Wrap coin carefully.

## SUNDAY SCHOOL LESSON

AUGUST 2

### PHILIP'S MISSIONARY LABORS

Golden Text: "They therefore that were scattered abroad went about preaching the word."—Acts 14:1.  
Lesson: Acts 8:5-40.  
Devotional Reading: Matthew 13:36-43.

### Explanations and Comments

**Reading and Explaining God's Word, verses 22-35.**—As we saw last week the persecution of Christ's followers after the Martyrdom of Stephen forced them to flee from Jerusalem, and they went everywhere preaching the word. Philip, like Stephen, was one of the seven deacons who, early in the history of the Church had been selected to help in the work, went to Samaria, where he was very successful in gaining converts to Christ. In the midst of his labors there he was suddenly directed to leave that field and go southward on the road that led from Jerusalem to Gaza. Our text says that an angel of the Lord gave him his commission, but this does not tell us who was the chosen messenger. "A vision, a dream, a human agent, some natural circumstances or instrument, all these are in Holy Scripture or in contemporary literature styled God's anointed messengers. Men saw them more deeply than we do, recognized the hand of a Superintending Providence where we behold only secondary causes, and in their ill-illumined spoke of angels where we should only see the work of men."

Philip obeyed the divine compulsion, and met a man of great authority, the treasurer of Caesarea, king of Ethiopia, who was returning from Jerusalem, and in their ill-illumined spoke of angels where we should only see the work of men. Philip obeyed the divine compulsion, and met a man of great authority, the treasurer of Caesarea, king of Ethiopia, who was returning from Jerusalem, and in their ill-illumined spoke of angels where we should only see the work of men.

## Order Of St. John Of Jerusalem

Service Held in Westminster Abbey

To Commemorate Centenary Of Revival Of Order

The Duke of Connaught, Grand Prior of the Order, the Duke and Duchess of York, and other members of the Royal Family were present at a service held in Westminster Abbey to commemorate the revival in Great Britain 100 years ago of the work of the Order of the Hospital of St. John of Jerusalem. The centenary address, delivered by the Archbishop of Canterbury, Prelate of the Order, was broadcast throughout the world. The congregation included members of all grades of the Order, and the numerous uniforms added colour to an imposing scene. The band of the Grenadier Guards played before the service began. The men of the Ambulance Divisions of the Order were seated in the South Transept; the women of the Nursing Divisions marched in procession to the same part of the Abbey from the West Door, led by the Duchess of York, their commandant-in-chief, who then took her place in the Sanctuary. There she was joined some minutes later by the Duke of York, in the uniform of the Royal Air Force, Princess Louise, Princess Beatrice, Prince and Princess Arthur of Connaught, Prince Alister, Countess of Athlone, Princess Helena Victoria, and Princess Marie Louise.

At the conclusion of the service the Grand Prior, Lord and Chapter of the Order, who were seated in the cloisters by a guard of honour of the Westminster School O.C., went to the Grand Priory of the Order, which had been held to the Order for the occasion, and there presided over the annual General Assembly of the Order. The Sub-Prior read messages of congratulation from the Commandery in South Africa and the branches of the Order in Australia and New Zealand, and an address was presented to the Grand Prior from the branch of the Order in Canada. There was also a message from the Commandery of the Order in Sweden. The Sub-Prior then read a message from Mr. Bennett, the Prime Minister of Canada, announcing that, in view of the good work done by the Order, the Canadian Government had decided to exempt it specially from the scope of the resolution of the Canadian House of Commons, in conformity with which the King has refrained from bestowing any titles or honours upon his Canadian subjects. In consequence of this communication, his Majesty had been pleased to invest several Canadian subjects with the insignia of various grades in the Order recently at Buckingham Palace—London Times, England.

**Look For Big Apple Crop**  
The B.C. Provincial Government Horticulturist estimates the apple crop in the Kootenay and Arrow Lake districts of British Columbia, at 93,000 boxes as against 76,000 boxes last year.

## Recipes For This Week

(By Betty Barclay)

### A VERY GOOD STEW

(Serves 5)  
2 pounds sirloin steak.  
2 large onions.  
2 tablespoons fat.  
4 medium potatoes.  
4 large carrots.  
1 can peas.  
1 tablespoon lemon juice.  
4 cups water.  
Salt and pepper to taste.

Put the fat in large stew pan. Heat until molten. Add the onion finely chopped. Then put in the meat cut in small pieces. Simmer until a little brown. Add the four cups of water and let cook slowly until meat is tender—about 1½ hours. Dice carrots and potatoes. Add to the above and cook 20 minutes longer. When ready to serve add the peas and lemon juice and heat. Thicken with a little flour and water.

### CHRYSANTHEMUM SALAD

(Serves 6)

6 small oranges.  
1 cup apples.  
Lettuce.

Cut through the skin of oranges three-quarters of the way down and in very fine strips, being careful not to break strips apart. Remove orange pulp and cut in pieces. Place orange skin in a bed of lettuce leaves and fill center with orange pieces and long slender pieces of apple. Serve with any desired dressing.

### Ask Federal Aid

Want Assistance In Carrying Out Public Works In Saskatoon

Federal assistance in carrying out a public works programme in excess of \$2,000,000 will be asked by Saskatoon as an unemployment relief measure to meet requirements here for the next twelve months, Mayor John W. Hair has stated.

A payroll of \$70,000 per month for about a year would be assured if the suggested request is accepted by the federal authorities. This would be sufficient, the mayor believes, to provide employment for all jobless married men in Saskatoon. No plans are being made for single unemployed men, the contention being expressed by the mayor that their problem was a purely federal matter.

## Hospital Opened At Chesterfield Inlet

Will Serve Nomadic Eskimos and Trappers In Far North

Bishop Turquetil and four nurses, members of the Grey Nuns Sisterhood, arrived at Churchill completing a long journey from Quebec by Canadian National Railways. The party was en route to Chesterfield Inlet, 500 miles north of this Hudson Bay port where the farthest north hospital on the continent opened last week. The veteran Roman Catholic churchman, known throughout the continent as the "Bishop of the Arctic," left with the nuns in his 25-foot motor boat on the hazardous trip along the rocky west coast of Hudson Bay.

With the opening of the hospital His Lordship sees the realization of a dream he had had for nearly two decades in the barren country of northern Canada. The hospital will serve the nomadic Eskimos and the dozens of trappers that search for fur on the northern fringe of civilization. Educational and medical centres are planned for the younger generations of Eskimos.

### Interesting War Relics

Regins Man Has Complete Set Of First World War Military Memorabilia

Interesting grim memories of the passions and hatreds stirred by the Great War, are brought to light by J. H. H. Regins, a man whose possession has come a complete set of reproductions of the plaques struck by German shells during the war, commemorating various outstanding events during the dark days of 1914-1918.

The plaques were distributed to the citizenry and soldiery of Germany with the object of bolstering morale and stirring up hate, chiefly against England. They depict, among other things, the sinking of the Lusitania, Lord Northbrook as a disseminator of lies, the triumph of German soldiers conquering a figure symbolic of the Allies. All the plaques have considerable artistic merit.

### A Strange Craft

Dipper Dredger Built On Tyne Has No Propelling Machinery

The strangest craft ever built on the Tyne, a dipper dredger named the Cyclops, left the river recently for the Havre (France) port authorities. The Cyclops has no propelling machinery, but her remarkable plant enables her to raise herself in the water by means of four "legs," each 70 feet long. These "legs," which can be operated rapidly, dip into the river or sea-bed. The dipper can tear into solid rock and scoop up 10 tons of material at a time.

## RE-ELECTION OF MINISTERS NOT NOW NECESSARY

Ottawa, Ont.—Government-sponsored after a day that had apparently been lost some time ago, a bill which re-elected members of the House of Commons to their seats for the next year, was introduced by the government today. The bill, introduced by Hon. Hugh Guthrie, Minister of Justice, came after a two-hour discussion.

An amendment from the Liberal front benches was defeated before final approval was given to the legislation, which now goes to the Senate.

The bill which passed in its final form was an interesting history. Originally introduced as a private member's measure by R. W. Jacobs, Liberal member for Carleton Place, it was first and second reading in the House.

It met its Waterloo, however, on a motion for consideration in committee. The government then amended the measure so that it should pass, and Hon. Hugh Guthrie, Minister of Justice, introduced a motion, which carried, calling for its restoration to the order paper. Thursday, July 23, with the support of the government, it went through the remaining stages.

Opposition came from Rt. Hon. Mackenzie King, leader of the opposition. He suggested, however, that the bill had lost confidence in itself, or it would not have been so weak the endorsement of the people for cabinet changes. While admitting that in Great Britain the necessity for re-election had been recognized, he pointed out that in Canada the situation in the two countries were very different, Mr. King maintained. The bill would give the Government a mandate to ignore divisions along racial, economic and religious lines.

The sound principle of the measure had inspired the Government to take it over, retorted Mr. Guthrie. He denied that the Government feared to face by-elections. He pointed out that in East Hamilton the Liberal Party was not even represented by a candidate. Saving of expense, expedition of public business, and convenience to Governments were the three reasons for the bill.

In the committee stage, Hon. Ernest Lapointe, former Minister of Justice, moved an amendment which would have the effect of limiting the period in which a newly-appointed minister would not have to go back for re-election to nine months after proclamation summoning a new parliament. The amendment was declared lost without a standing vote. Opposition to the bill was expressed by Armand Lavergne, Conservative member for Montserrat, and Deputy Speaker of the House. When asked if he accepted cabinet rank, said Mr. Lavergne, his constituents should be given an opportunity to pass upon the change.

Mr. Jacobs supported the bill, expressing satisfaction that it was finally to pass the House of Commons.

## Move From Dry Areas

Alberta Farmers Take Up Land Northwest of Edmonton

Edmonton, Alberta.—Some 56 families, out of 74 applications received and approved, have already been moved from the dunes and around Hannan to new locations northeast and northwest of Edmonton, where most of them have taken up homesteads. They brought their stores and effects, each family being allowed two carloads, under the free freight policy agreed upon between the government and the railways.

Numbers of other farmers from the dry belt are now looking for suitable locations, and the Department of Agriculture has men at work helping them.

It is expected by provincial officials of the Department of Agriculture that there will be a considerable movement of settlers during the next three weeks, the policy having until August 10 to run.

## Death of Mrs. Richardson

Winnipeg, Man.—Mrs. R. L. Richardson, 69, widow of R. L. Richardson, founder of the Winnipeg Tribune, died at the home of her daughter, Mrs. Harcourt Vernon, She had been an invalid for several years. Mrs. Richardson was of Trail, B.C., is a daughter.

## Declare Moratorium

Topoka, Kans.—Many Kansas counties have declared a moratorium on taxes in an effort to assist farmers in the country's chief wheat-producing state who are offered the lowest prices in history in a year which brought their largest crop.

W. N. 1. 1900

## Building Road in North

Will Open Up Route From Flin Flon To Hudson Bay Junction

Regina, Sask.—Construction on the new government road from Turnberry to Hudson Bay Junction, opening up the route from Flin Flon, Manitoba, is proceeding in good shape, according to Hon. J. A. Mackenzie, Minister of Railways, Labor and Industry, who said that it is expected the earth grading will be completed by the completion of the fall.

At Turnberry the Manitoba department meets the Saskatchewan road and proceeds north to The Pas and Flin Flon.

All this construction is being undertaken by relief work.

## Appointment Not Made

Post of Assistant Commissioner of R.C.M.P. Still Vacant

Ottawa, Ont.—Contrary to a recent report that Col. James W. Spaulding, of Regina, had been appointed senior assistant commissioner of the Royal Canadian Mounted Police, Commissioner Scott-Stanley has said that no appointment will be made.

No candidate for the post here has been made, although the retirement to pension of Lieut.-Col. G. W. Vasey, senior assistant commissioner, is announced.

## PUBLIC HEARING IN BEAUHARNOIS PROBE IS ENDED

Ottawa, Ont.—Climaxing the final public hearing of the Beauharnois committee, R. O. Sweeney, head of the colonial power, assumed responsibility for the dollar of campaign funds with which the Beauharnois name has been connected. The contributions were on his responsibility and he, personally, assumed the whole liability. The sums paid out by the Beauharnois Company, a Montreal corporation, to the committee, he said, had been repaid in full.

Conflicting rumors were again swirling about the committee. A conference will be held with the government of Quebec, it was stated, arising out of the fact that that company secured its power rights through a charter granted by the legislature of that province.

For the past two weeks the sittings of the committee have again been spotlighted from the House of Commons. The evidence has been prolific with features, not the least of which was that campaign funds, totalling in excess of \$850,000, had been distributed by Mr. Sweeney among the Liberal and Conservative Federal and Provincial Parties.

The cost of the Beauharnois project to date has been \$29,768,816, said A. J. King, committee auditor. In an exhaustive analysis of the balance sheet of the company, Mr. King said it would be fair to assume that slightly over \$7,000,000 represented "water."

When questioned later on this point by G. H. Monk, Quebec M.C., chief Beauharnois counsel, Mr. King admitted he had not taken into consideration any value that might be attached to the company's charter from Quebec, or the approval of its plans by the Dominion.

When referring to campaign funds contributions, Mr. Sweeney said there had been "tacit approval" by the board of directors to their payment. He explained the money had been paid by Beauharnois to a company owned entirely by him. He was responsible for the repayment of the sums, and already had paid back a considerable proportion.

## Reviews Present

### Government Activities

Premier Anderson Says Next Saskatchewan Election Will Not Be Held Until 1934

Yorkton, Sask.—The next provincial election in Saskatchewan will not be held until 1934. This was one of the announcements made both by Premier Dr. J. T. M. Anderson and Hon. A. C. Stewart, Minister of Highways, when addressing 5,000 people here.

Mr. Stewart reviewed some of the activities of the government, and the premier outlined the policy of the government with respect to future activities. He stressed the problem of relief, citing that everything that is humanly possible was being done to meet the situation, which he admitted is a serious one.

Premier Anderson referred to the loyalty of the members of the government, and also all the supporters in the legislature, citing some of the criticisms levelled at him and his government, and then explained what efforts had been made to meet the situation in the past and what the government intended to do in the future.

Among the matters the premier discussed were, carrying out of pre-election promises, the reorganization of the education department to include lessons for rural pupils in the higher grades over the radio; restoration of the natural resources and consequent emoluments to the province; land settlement policy and loan to help settlers; provincial parks and encouragement of prospectors to develop the north country mining territory; the public debt; financial arrangements with the banks and wheat pool; relief in the dry areas; and for urban centers; the calling of an economic conference to deal with settlement between debtors and creditors; and the 21 demands of the United Farmers of Canada, Saskatchewan section.

## Trans-Canada Flight

Non-Stop Flight From Halifax To Vancouver in August

Vancouver, B.C.—The first non-stop flight from Halifax to Vancouver will take place during the Canada Pacific exhibition from August 25 to 29 here, it is announced by J. K. Matheson, general manager of the Vancouver Exhibition Association, who has been in communication with sponsors of the flight.

The flight was originally planned to take place during the airport celebrations, but now it is likely to be tied up with the exhibition. J. Williams, agent for the flyer in Montreal, has forwarded details for consideration by a well-known French war ace, who is at present in Canada, it is stated.

Proposal also has been made from the same source that a round-the-world flight in an attempt to break the Gatty-Pot record be made, starting from Vancouver on the opening date of 1932 exhibition, and being completed here before the close, seven days later. This matter will also be considered by directors.

## Must Pay Taxes

Tax Collectors in Germany Will Play No Favorites

Berlin, Germany.—Germany's tax collectors are working on orders to get what is coming to the government and pay no attention to the excuses of taxpayers in arrears. A decree established heavy penalties for citizens who have made false declarations.

Without waiting for the outcome of the conference of nations at London, England, the Reichsbank has begun issuing almost \$250,000,000 in silver money under the recently-decreed change in the currency law.

## FAMOUS WOMEN SHOTS ATTEND BISLEY MEET

This picture shows two women competitors taking part in the Bisley Shooting Meet in England, and proves that women's rifle is more dangerous in some one's hands than a woman's hand. The woman on the left is Miss E. Babcock (left) and Miss M. Porter (right), the latter being the winner of last year's King's Prize. To win this coveted trophy in the rifle world, Miss Porter had to shoot her way to victory over 1,000 experts from all parts of the British Empire.

## PRESIDENT-ELECT

Winnipeg, Man.—Prairie government representatives were in conference here discussing moves that will aid in relieving the wheat's wheat crisis. Premier J. E. Brownlie, of Alberta, was present and joined Premier J. Bracken, of Manitoba, and Hon. Jas. F. Bryant, K.C., Saskatchewan Minister of Public Works, in conferring with wheat pool leaders regarding handling and financing of the year's crop.

Establishment of an interprovincial trading corporation and reorganization of the wheat pool, permitting marketing of the 1931 crop according to a formula laid down by Premier R. B. Bennett, was said to have held the attention of the conferees. It was learned a great deal of work was accomplished towards launching the organization.

## Saskatchewan Relief

Hon. Howard McConnell Says Hundred Thousand Homeless Will Require Aid

Montreal, Que.—About 100,000 residents of Saskatchewan will have to be fed by the Provincial and Federal Governments during the coming winter. Livestock to the number of 150,000 head will have to be taken from drought areas to spots where the feed is more plentiful. Yet Saskatchewan will recover its lost wealth, according to Hon. Howard McConnell, K.C., provincial treasurer and minister of municipal affairs, who was in Montreal to consult with officers of the Royal Bank of Canada in connection with the financial situation of the province.

Out of the 302 townships in Saskatchewan, 75 will require Federal and Provincial relief during the coming winter, according to Mr. McConnell.

"The drought has been so bad," he said, "that even potatoes have not grown in some sections of the province. That is why we will have to feed many people through the winter. It is without a doubt the most severe rainless spell that the west has had since the beginning of the century."

"People here in the east," he continued, "are inclined to reproach us sometimes, because we are now in distress. But you must remember that we now have had three years of 1931 crops and very low prices. Actually we have not had a good rain in Saskatchewan since July, 1929."

But the present condition in Saskatchewan is only temporary, according to Mr. McConnell. Low crop yields in wheat producing countries, smaller acreage seeded, will soon absorb the wheat surplus, then prices will rise once more and Saskatchewan will be well off.

## Pledge Support To Soviets

Resolution Adopted By Ukrainian Farmers in Session At Winnipeg

Winnipeg, Man.—Final session of the Ukrainian Labor-Farmer Temple Association here was taken up with the adoption of resolutions covering the situation in your being able to obtain a great many times this amount.

"With reference to cargo space we have already put in touch with your department a Norwegian firm of shipping brokers, Joachim Greig & Co. Bergen, who are most anxious to send ships to Churchill this fall."

"If there are no government ships or Canadian lines who are anxious to have the honour of being the first to carry wheat from this port, I would suggest that these people be communicated with and advised that it will cost them no more, taking into consideration marine insurance and harbor charges, than it would do to take the same cargo from Montreal, which I understand is your latest proposal. I think you will have no difficulty in adjusting the situation."

"Representatives of a Vancouver shipping firm called this week and are now on their way to Ottawa to interview you with reference to increased cargo rates. Possibly you can make this fit in such a way as to greatly facilitate the object we are trying to attain."

Accepting the challenge of the Federal Government, Saskatchewan will supply the entire shipment of 750,000 bushels of wheat for the first official test of the new Hudson Bay route. The senior wheat producing province of the Dominion has taken grain and places the responsibility of providing the boats on the Federal Government.

These arrangements have been completed by Hon. J. A. Mackenzie, Minister of Railways, Labor and Industries, who said that he has received positive assurance of the amount of grain needed for the test shipment.

## Premiers Confer At Winnipeg

Discuss Plans For Relieving the Western Wheat Crisis

Winnipeg, Man.—Prairie government representatives were in conference here discussing moves that will aid in relieving the wheat's wheat crisis. Premier J. E. Brownlie, of Alberta, was present and joined Premier J. Bracken, of Manitoba, and Hon. Jas. F. Bryant, K.C., Saskatchewan Minister of Public Works, in conferring with wheat pool leaders regarding handling and financing of the year's crop.

Establishment of an interprovincial trading corporation and reorganization of the wheat pool, permitting marketing of the 1931 crop according to a formula laid down by Premier R. B. Bennett, was said to have held the attention of the conferees. It was learned a great deal of work was accomplished towards launching the organization.

## Private Depositor Will Draw Regular Interest

Only Current Commercial Accounts Affected By Decrease

Ottawa, Ont.—Private depositors will not be affected by the reduction of interest rates. The interest rate on current accounts as announced by Canadian banks, according to long-standing officials. The reduction from two per cent. to 3 1/2 per cent. goes into effect August 1, and is strictly on current commercial accounts. Private depositors will continue to draw three per cent. interest as usual, it was said.

## GRAIN CARGO IS ARRANGED FOR BAY ROUTE TEST

Winnipeg, Man.—Brig-Gen. R. W. Patterson, president of the On-to-the-Bay Committee, wired Hon. J. Bracken, Minister of Railways and Canals, that 750,000 bushels of wheat is stored in Saskatchewan, "definitely earmarked to go out through Churchill this fall" and that a Norwegian firm was ready to supply ships to carry the first cargo of grain by the Hudson Bay route.

The message followed a meeting here of the On-to-the-Bay Association executive, which discussed Mr. Manion's announcement that the Dominion Government will not accept responsibility for making train shipments this fall from Churchill. The executive instructed the Ottawa branch of the association to demand that the Government furnish sufficient grain for the test shipments would not be available.

"Noting your statement that you had been unable to secure wheat for the purpose of the test," Gen. Patterson's message read, "I, personally, succeeded in having 150,000 bushels, at present stored in Saskatchewan, definitely earmarked to go out through Churchill this fall, provided that cargo space is available, and on your part we will be able to obtain a great many times this amount."

"With reference to cargo space we have already put in touch with your department a Norwegian firm of shipping brokers, Joachim Greig & Co. Bergen, who are most anxious to send ships to Churchill this fall."

"If there are no government ships or Canadian lines who are anxious to have the honour of being the first to carry wheat from this port, I would suggest that these people be communicated with and advised that it will cost them no more, taking into consideration marine insurance and harbor charges, than it would do to take the same cargo from Montreal, which I understand is your latest proposal. I think you will have no difficulty in adjusting the situation."

"Representatives of a Vancouver shipping firm called this week and are now on their way to Ottawa to interview you with reference to increased cargo rates. Possibly you can make this fit in such a way as to greatly facilitate the object we are trying to attain."

Accepting the challenge of the Federal Government, Saskatchewan will supply the entire shipment of 750,000 bushels of wheat for the first official test of the new Hudson Bay route. The senior wheat producing province of the Dominion has taken grain and places the responsibility of providing the boats on the Federal Government.

These arrangements have been completed by Hon. J. A. Mackenzie, Minister of Railways, Labor and Industries, who said that he has received positive assurance of the amount of grain needed for the test shipment.

## STEPS ARE TAKEN TO Avert CRISIS IN GERMANY

London, England.—The seven-power conference has ended after taking temporary measures to revive world confidence in Germany's financial and economic future.

As it was forecast, these palliatives were confined to a three-month extension of the 100,000,000 loan granted to the Reichsbank through the Bank of International Settlements, to concerted measures in all countries for the maintenance of existing credits in Germany and to recommendations dealing with Germany's future needs.

The final plenary session at the foreign office in Downing Street, London, England, ended with felicitous remarks which stressed the interdependence of nations, and welcomed the participation of the United States at the European council table.

While the conference was being generally hailed as a success, little enthusiasm could be detected among the headquarters of the German delegation. Although admitting the Brüning Government has secured a respite from the international financial crisis through the achievements of the London meeting, and also securing a further breathing spell for the defeat of Nationalist and Communist efforts to convene the Reichstag, Chancellor Brüning and Foreign Minister Brüning are still rick their political position, according to the German view, unless they return to Berlin to handle tangible assurance of new credits.

On the other hand, the British, French and American delegations were agreed that the London meeting had accomplished its purpose as far as checking Germany's rush toward a financial collapse is concerned.

As far as new credits for Germany are concerned, the British delegation did was to "note with interest" the joint guarantees recently placed by hundreds of German industrial concerns. Upon these great concerns, Germany, by a recent emergency decree, could have asked for credit facilities amounting to \$100,000,000. The German view is that unless some credit is consummated, the Brüning Government will again be in danger of collapse.

It was also recommended that the World Bank for International Settlements establish immediately a committee to study the whole question of German credit needs, including the possibility of converting a portion of the short term credits into long term credits.

Increase in Tourist Business

Ottawa, Ont.—The widely-held belief that tourists are not touring in these days of "light money" has been proven wrong. The number of tourists in Canada is increasing. Clive figures which have registered 2,198 persons have registered 2,198 persons in the tourist camp so far this summer, an increase of 50 per cent. over the same period last year.

Making Railway Cut-Off

Ottawa, Ont.—Although a report has been received on the projected Marking railway cut-off in Manitoba, the Department of Railways and Canals has not completed a study of it. This information was given in the House of Commons by Hon. R. J. Manion, the minister, to A. L. Beaudin, Liberal, Provencer.

Broadcast From Great Height

Friedrichshagen, Germany.—The first radio broadcast from the stratosphere was heard last week when a diminutive balloon, with automatic recording instruments and vest-pocket radio set, was attached to the Zeppelin crew it had reached an altitude of 50,000 feet.

Prevention Of Crime

Rochester, N.Y.—The crime experts of the International Association of Identification, gathered here, had ringing in their ears the advice of Police Commissioner Edward J. Connelley, of New York City, that the police should pay more attention to preventing crime among the youth of the land.

Reduced To Lowest Limit

Paris, France.—French armaments have been reduced to the lowest possible point the government declared in a memorandum on disarmament issued in answer to the request of the League of Nations Council for information preliminary to the 1932 world disarmament conference at Geneva.

Shipping traffic at the port of Havre, France, has nearly doubled in the last ten years.

# CHAMPION CHATTER

Vol. 4 Thursday, July 20, 1934 No. 31

Published in the interest of the People of Champion and Farmers of the vicinity.  
GEO. L. DEPUÉ, Editor.

Lifelike dolls are being made now that are the most human except that when you squeeze one it doesn't say "Let's eat."

### Positive Feed On Me.

Dep. Combines

The feeder consists of a conveyor composed of two steel chains running parallel to which wooden slats, steel covers, are riveted at intervals. This conveyor carries the grain as it comes from the elevator until it reaches the cylinder. The movement of the grain in the feeder is assisted by two beaters. The wings on the lower one are saw-toothed and the upper one is a drum cylinder with a number of spiked lugs which not only insure positive delivery of the grain to the cylinder but also

act as a retarder, regulating the flow of grain and preventing slugging. The feeder tilts up and down with the platform as it is raised or lowered. The grain is well spread out over the entire width of the cylinder and does not

bank on either side of the feeder when the elevation of the platform is changed. The flow of grain from the sickle to the cylinder is uninterrupted, the grain reaching the cylinder heads first, as in the manner of expert hand feeding of a stationary

thrasher. The retarding effect of the spiked beater prevents slugging of the cylinder and there are excessive loads on the auxiliary engine. The feeder is enclosed by a sheet metal housing with a hinged cover for easy access.

Have you heard the new Philco 9 tube super heterodyne radio? It's a wonder, selling

for \$80.50, complete. The Waterloo visitors are all back with some real fish stories.

## Local and General

Old Groke has been a visitor in the district for the past two weeks.

Mrs. L. J. Adams and W. M. Adams are spending the week at Banff.

E. Camulini spent several days at Taber recently, where he has an irrigated farm.

Mr. and Mrs. W. Collison and family are spending part of their holidays in Champion and vicinity.

Sherman Hargraves and wife of Los Angeles are visitors for a time with Mr. and Mrs. O. E. Hargraves of Champion.

Mr. and Mrs. W. Harris, Miss Leola Johnson, H. E. Johnson and Gordon McLean left on Sunday for Waterton for a holiday trip.

Present indications are for harvest at a much earlier date than was anticipated, the extremely hot weather having turned the color of many fields.

There was a very good turnout to the dance in the Community Hall on Saturday night and Joe Tomto's orchestra provided music to the entire satisfaction of the dancers.

Parties having material for the community exhibit at Carmangay are requested to deliver same not later than Wednesday afternoon, August 5th. The exhibit will be prepared at the home of Mrs. W. A. Summers, just east of Champion.

H. L. Hummon and family arrived in town recently. Mr. Hummon being the new buyer for the National elevator, managed by J. Taylor since the resignation of Earl Boss. They have secured H. Higgins' residence and are now located there.

Mr. and Mrs. R. B. Maxwell returned last Thursday from a holiday trip which included Glacier Park, Seattle, Vancouver and other cities en route. Mr. Maxwell says two weeks is too short a time for this trip. Two months would be nearer the time necessary to take in the interesting points.

Mary Joan McKibbin, infant daughter of Mr. and Mrs. A. F. McKibbin, of Carbon, Alberta, died Thursday at the family residence following a lengthy illness. She is survived by her parents. Funeral services will be held Friday afternoon at 2 o'clock from the Shaver funeral home. Burial will take place in Bursledon cemetery.

Mr. and Mrs. F. Gottenburg and family were among Waterton visitors.

Dr. and Mrs. Heal are spending their holidays on a fishing trip in the vicinity of Waterton.

Mr. and Mrs. Hugh McIlvina, of Lethbridge, were recent guests of the latter's parents, Mr. and Mrs. R. J. Cowell.

Mr. and Mrs. A. Roggles, Miss Ruggles and Harry, were visitors at Waterton during the past week. They were delighted with their outing.

Anna Caroline Baker celebrated her 10th birthday by a picnic party to the Little Bow, near Orville Smith's. Needless to say a big time was had by all.

Mr. and Mrs. (Mickey) Boner left for Queenstown last week where Mickey has started a pool room and barber shop. Mrs. C. Boner drove them over to their new home.

## "What's Happened to The Light?"

We never miss the water until the well runs dry. A faithful lamp, doing duty for many months in cellar or hallway, gives up the ghost. You flip the switch and when nothing results, impatiently exclaim: "What's happened to the light?" Suppose, however, that the trouble goes farther than the lamp—that a flood wipes out the power station, or a severe storm blows down the wires. What then?

Is industry equipped for lack of electrical service? Are the doors of mercantile establishments locked? Are streets left in darkness? NO! Interconnection, the linking of one system with another, is for just such emergencies. Immediately power is again available. Interconnection means the protection of service against interruption. It is just like having two or even three wells to draw from.

The Calgary Power Company representative in your territory can procure for you any item of electrical equipment. He will tell you about the attractive terms upon which you can purchase many electrical appliances—with a small cash payment and the balance on your monthly light bill.
